Advancements in Venous Thrombosis Management: From Prevention to Long-Term Care

Message from the Guest Editor

Venous thromboembolism (VTE) is a disease associated with high mortality, morbidity, and economic costs for national health systems. The incidence rises with increasing age, and patients with malignancy, pregnancy, and hospitalisation are at increased risk for VTE. The management strategies of VTE have changed in recent decades, including treatment with direct oral anticoagulants (DOACs), catheter-directed thrombolysis, and inferior vena cava (IVC) filters. However, there are still some issues with an uncertainty of evidence, such as very long-term anticoagulant treatment and the management of VTE in high-bleeding/high-recurrence-risk patients (i.e., cancer-related VTE and antiphospholipid syndrome). Emerging treatments targeting other coagulant factors, such as factor XIa inhibitors, are showing promising results. This Special Issue focuses on recent advances related to the prevention, acute treatment, and long-term management of VTE.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
