

## Special Issue

# Understanding Dermatitis: Symptoms and Effective Treatment Options

### Message from the Guest Editors

Dermatitis refers to a broad group of inflammatory skin diseases with diverse etiologies and immunological characteristics, including atopic dermatitis, psoriasis, contact dermatitis, seborrheic dermatitis, and prurigo. Recent advances in molecular dermatology have elucidated complex networks involving IL-4, IL-13, IL-17, IL-23, JAK-STAT, and the Aryl Hydrocarbon Receptor (AhR) pathways, which are now major therapeutic targets for biologics and small molecule inhibitors. While these groundbreaking advances have significantly improved clinical outcomes, the reasons why specific agents demonstrate varying efficacy across disease subtypes and patient populations remain unclear. This Special Issue, “Understanding Dermatitis: Symptoms and Effective Treatment Options,” aims to provide an integrated understanding of disease mechanisms, clinical phenotypes, and treatment responsiveness across various forms of dermatitis. We welcome submissions on biomarkers, comorbidities, and real-world data to advance precision medicine and improve patient care in inflammatory skin diseases. Contributions may include original articles and reviews.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
