Clinical Perspectives of Vascular and Endovascular Surgeries

Message from the Guest Editors

Recently, there have been numerous innovations in vascular and endovascular surgery, yielding promising results concerning the clinical outcomes and quality of life for patients. Notable advancements include the percutaneous arteriovenous fistula, the covered endovascular reconstruction of the aortic bifurcation technique, and intravascular lithotripsy, among others. Nonetheless, several aspects necessitate improvement, particularly the long-term performance of arteriovenous fistulas, lower limb bypass patency, restenosis risk following carotid endarterectomy, long-term survival following open repair of abdominal aortic aneurysms, and the risk of restenosis following percutaneous balloon angioplasty or stenting.

This topic aims to highlight current advancements in both open and minimally invasive techniques, innovations in perioperative care, long-term patient outcomes, and the integration of new technologies in clinical settings. We particularly welcome contributions that explore multidisciplinary approaches, address complex vascular pathologies, or offer novel perspectives on clinical decision-making and patient management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
