Clinical Perspectives on Surgical Management of Knee Injuries

Message from the Guest Editor

Knee injuries, including osteoarthritis, meniscal tears, ligament damage, and cartilage degeneration, present significant challenges in orthopedic care. These conditions impact millions of patients worldwide, leading to pain, reduced mobility, and decreased quality of life. Surgical management remains a cornerstone in addressing these issues, with ongoing advancements in techniques and technologies enhancing outcomes. This Special Issue will focus on the latest clinical perspectives and innovations in surgical treatments for knee injuries. We invite submissions that explore cutting-edge approaches and comprehensive evaluations of patient outcomes. Your contributions will provide valuable insights into optimizing surgical care and advancing the field of knee surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France
