Clinical Diagnosis and Therapeutic Approaches for Acute and Chronic Coronary Syndromes

Message from the Guest Editor

Coronary artery disease (CAD) remains a significant health concern globally, characterized by the narrowing or blockage of coronary arteries due to atherosclerosis. However, up to half of patients undergoing coronary angiography for suspected myocardial ischemia and about 8% of patients with myocardial infarction have unobstructed coronary arteries. Thus, management of patients with myocardial ischemia or myocardial infarction is complex and involves a comprehensive assessment of risk factors, symptoms, and invasive and non-invasive diagnostic tests. Interventions may include lifestyle modifications, pharmacotherapy, percutaneous coronary intervention, or coronary artery bypass grafting, tailored to individual patient needs.

Multidisciplinary collaboration among cardiologists, cardiac surgeons, and other healthcare professionals is crucial. Advances in research continue to enhance our understanding of pathophysiology, both in patients presenting with acute coronary syndrome (ACS) or chronic coronary syndrome (CCS), and refine treatment approaches, emphasizing personalized medicine and precision interventions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
