Musculoskeletal Disorders: Clinical Rehabilitation and Physiotherapy

Message from the Guest Editor

Physiotherapy and clinical rehabilitation offer different approaches for the assessment and management of musculoskeletal disorders. As of now, there has been considerable research on physical therapy and clinical rehabilitation areas; however, standardized protocols for the clinical assessment and key therapies of musculoskeletal pathologies requiring physical therapy interventions are still needed. Furthermore, novel evidence-based therapies, such as manual therapy, therapeutic exercise and movement rehabilitation programs, electrotherapy, respiratory interventions, and thermotherapy may have benefits in acute and chronic syndromes, as well as in new clinical assessment interventions. I would like to invite researchers and clinicians to contribute their expertise, insights, and findings in the form of novel and original research articles and reviews for this Special Issue. The purpose of this Special Issue is to highlight the benefits of physical therapy and clinical rehabilitation for the assessment and management of musculoskeletal disorders, related to the health of the general population.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
