Unraveling Myopia: Current Science, Clinical Impact, and Future Horizons

Message from the Guest Editors

The global burden of myopia is escalating at an unprecedented rate, with projections indicating that nearly half of the world's population will be affected by 2050. Alongside this epidemiological shift, we are witnessing a surge in high myopia and its associated sight-threatening complications, such as myopic maculopathy, choroidal neovascularization, and retinal detachment. This Special Issue aims to bring together current clinical advances and future prospects in the diagnosis, prevention, and management of myopia and its complications. We welcome contributions from researchers and clinicians working on epidemiological insights, optical and pharmaceutical interventions, innovations in imaging, genetic predisposition, environmental risk factors, and the role of digital devices in myopia progression. By consolidating current knowledge and emerging research, this Special Issue seeks to foster interdisciplinary dialogue and guide evidence-based clinical practice in myopia control and management. We invite original research articles, systematic reviews, and clinical trials from experts around the globe.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
