

## Special Issue

# Breast Reconstruction: The Latest Advances and Prospects

### Message from the Guest Editor

This Special Issue titled “Breast Reconstruction: Latest Advances and Prospects” aims to explore the most recent advancements and future prospects in the field of breast reconstruction. This collection of articles will cover various topics related to breast reconstruction techniques, including innovative surgical approaches, emerging technologies, patient outcomes, and the psychological aspects of breast reconstruction. The goal is to provide insights into the latest developments in this area and shed light on potential future directions. With contributions from leading experts, this Special Issue intends to provide a valuable resource for healthcare professionals and clinical researchers involved in breast reconstruction.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
