

Special Issue

Diagnosis, Treatment and Prognosis of Coronary Heart Disease: 2nd Edition

Message from the Guest Editor

Dear colleagues, It is my pleasure to invite you to contribute to the Special Issue entitled "Diagnosis, Treatment and Prognosis of Coronary Heart Disease: 2nd Edition". This is a new edition; we published nine papers in the first edition. For more details, please visit https://www.mdpi.com/journal/jcm/special_issues/6MI2JAR36K Despite the advancements in diagnostic and therapeutic approaches over the past decades, coronary heart disease (CHD) remains the leading cause of morbidity and mortality worldwide. Emerging data regarding potential prognostic improvements in CHD are coming from new areas of intervention, such as precision medicine, minimally invasive procedures, stem cell therapy, and the clinical application of artificial intelligence. We invite manuscripts describing the latest information on coronary heart disease diagnosis, treatment, and prognosis, including original clinical studies and reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
