Current Challenges and Opportunities in Oto-Rhino-Laryngological Surgery

Message from the Guest Editors

In recent decades, the surgical perspectives of oto-rhino-laryngology has dramatically developed, pushing forward the technical limits and the indications of traditional ENT surgery. Along with the refinement of head and neck and otology procedures, the development of skull-base surgery, the spread of endoscopic techniques, and the application of computer-guided surgery paradigm have brought ENT surgeons to face more and more demanding challenges. Regardless of the subspecialty field, one of the most attractive issues in contemporary ENT surgery is the optimization of functional results, which has led the surgical paradigm to shift from the traditional disease-oriented approach to a more modern patient-oriented one. The aim of this Special Issue is to showcase up-to-date evidence on the contemporary challenges in various fields of oto-rhino-laryngological surgery, focusing in particular on the optimization of functional results. Original papers from international leading groups, as well as review articles, focused on various surgical topics related to ENT subspecialties are welcome for submission.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
