

Special Issue

Targeted Treatment in Psoriasis

Message from the Guest Editor

This Special Issue is dedicated to exploring the topic of targeted treatment in psoriasis. The goal is to gather research papers that highlight recent advancements and novel strategies for treating psoriasis. We are excited to receive original research articles that focus on the mechanisms of action, safety, and clinical outcomes of targeted therapies for psoriasis.

Specifically, we welcome papers that explore the use of biological agents, small molecules, and other innovative drugs that target specific pathways involved in psoriasis pathogenesis. It is important to note that we will not be accepting mini-reviews or case reports for submission in this Special Issue. Instead, we encourage authors to submit their original research findings that provide valuable insights into new and emerging treatments for psoriasis. Overall, this Special Issue aims to expand our knowledge and understanding of targeted treatments in psoriasis and to promote the development of more effective and personalized therapies for this chronic disease. We look forward to receiving your submissions and helping to advance the field of psoriasis research.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
