New Trends and Challenges in Critical Care Management

Message from the Guest Editor

Over the past decade, significant advancements have been made in the field of critical care, particularly through the integration of innovative technologies that offer new opportunities for patient treatment. Notably, there has been substantial progress in the technology and availability of Extracorporeal Organ Support Systems (ECOSs), including ECMO, blood purification, liver dialysis, and the combined use of various techniques. Technological progress has also driven advancements in ventilation modalities, leading to improved lung-protective strategies. Alongside these technological advancements, new pharmacological therapies and diagnostic methods have emerged. Furthermore, increasing attention is being paid to enhancing patient well-being and comfort during critical care, as well as post-ICU recovery and functioning. In this Special Issue, we focus on exploring the latest opportunities and innovations in the treatment of critically ill patients, along with the emerging challenges that have arisen in recent years. We will also discuss future perspectives and the potential impact of these advancements on critical care practices.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
