

## Special Issue

# Insights on Cancer Diagnosis, Treatment and Side Effects Management

### Message from the Guest Editors

The landscape of oncology continues to evolve through meaningful progress in diagnosis, treatment, and supportive care. This Special Issue, “Insights on Cancer Diagnosis, Treatment and Side Effects Management,” invites contributions from all areas of cancer research and clinical practice that reflect the multidisciplinary nature of modern oncology. We are seeking original articles and reviews that explore improvements in diagnostic accuracy and therapeutic strategies—including systemic therapies, surgery, radiotherapy, and emerging modalities—as well as approaches to managing the side effects and complications of treatment. Special attention will be given to work that fosters integration between specialties and enhances the patient-centered approach to cancer care. This Special Issue aims to create a platform for sharing evidence-based insights and innovations that contribute to better outcomes and quality of life for individuals affected by cancer. We look forward to your valuable contributions.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
