

Special Issue

Updates in Diabetes and Obesity in Reproductive Health

Message from the Guest Editors

Obesity and diabetes are increasingly prevalent medical conditions that pose significant challenges in reproductive health. Over the last few decades, their incidence has risen globally, including among women of childbearing age. In addition, this field has witnessed remarkable progress, with significant advances in research, clinical care, and public health strategies.

These developments have improved our understanding of the complex interactions between obesity, diabetes, and reproductive health. In this Special Issue of the *Journal of Clinical Medicine*, we are offering a platform to highlight the broad diversity of research conducted across this field. This Special Issue will focus on new insights, current challenges and controversies, recent advances, and future perspectives in the field of obesity and diabetes in reproductive health. We anticipate that the research presented will promote fruitful discussions between physicians and researchers from different fields of medicine that will translate into the adoption of best practice applications in clinical, public health and policy settings.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
