Chronic Lung Conditions: Integrative Approaches to Long-Term Care

Message from the Guest Editor

Currently, numerous categories of health professionals are raising awareness of the increasing burden of chronic lung conditions. It is supposed that this status quo will continue to be a major concern in the context of global climate change, environmental air pollution, and tobacco and TB epidemics, causing various issues to respiratory health—not to mention the recent COVID-19 pandemic that is still not fully understood regarding its long-term impact on the lungs. This Special Issue of the *Journal of Clinical Medicine* aims to highlight the major research gaps and progress in the broad area defined as chronic lung conditions. Its goal is to accentuate the need for an integrative approach of these entities, as well as to point out the benefits of long-term care for chronic lung disease course and treatment outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
