# Trends in Plastic and Reconstructive Surgery

### Message from the Guest Editors

The field of plastic and reconstructive surgery has perpetually been on the cusp of innovation. Persistently presented with complex problems, the role of plastic and reconstructive surgeons remains two-fold. This objective involves restoration or improvement in function while simultaneously optimizing the aesthetic form. The pursuit of these dual goals has propelled researchers within the field to think critically and develop creative solutions that foster continual improvement. An improved understanding of anatomy and technological advancements has equipped plastic and reconstructive surgeons with a diverse toolbox. As new techniques and devices emerge, a critical scientific inquiry into surgical outcomes remains an important tenet of the field in order to assess for complications and the longevity of outcomes. In this Special Issue, we welcome authors to submit manuscripts that deal with recent trends within various focus areas of plastic and reconstructive surgery.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
