Current Surgical Management of Pancreatic Cancer

Message from the Guest Editors

We invite your participation in the current Special Issue of *JCM* on “Current Surgical Management of Pancreatic Cancer”. Pancreatic cancer has a poor prognosis following its diagnosis. Although the progress of treatment for pancreatic cancer is remarkable, surgery is the only treatment with the potential for curing it. Since neoadjuvant and adjuvant therapies used for pancreatic cancer have been recently developed, the role of surgery for pancreatic cancer has changed. Furthermore, minimally invasive surgery, including laparoscopic and robotic surgeries, is becoming mainstream even in hepato-pancreatico-biliary surgery. Minimally invasive surgery for pancreatic cancer might be safe and feasible; however, further research is required. In the current Special Issue, we aim to discuss the current surgical management of pancreatic cancer, focusing on open and minimally invasive surgery, neoadjuvant and adjuvant therapies, and the outcomes. The translational research conducted on this topic is also invited for submission. We anticipate receiving your submissions to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
