New Advances in Clinical Reproductive Medicine

Message from the Guest Editors

Reproductive health problems—especially infertility—become increasingly prominent. Over the past few decades, the field of reproductive medicine developed rapidly. There were 8 million children born through assisted reproductive technology (ART) between 1987 and 2018 worldwide. The development of ART provides an effective method for infertile couples. In addition, novel basic advances and technologies may greatly promote the development of reproductive medicine and ART. It is believed that the combination of reproductive medicine with other disciplines such as genetics, bioinformatics and bioengineering would create new possibilities for fertility reconstruction and preservation. This Special Issue aims to focus on some hot issues in reproductive medicine and to showcase the latest and cutting-edge research results from some of the most exciting research in reproductive medicine while promoting the development of new ideas and research directions. We are particularly interested in basic, translational and clinical studies in the field of female fertility. This Special Issue will highlight manuscripts that are original research or review papers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
