

## Special Issue

# Advances in PET/CT Imaging for Breast Cancer Patients and Beyond—Volume II

### Message from the Guest Editors

Over the last decade, molecular imaging has remarkably improved the management of patients with breast cancer. 18F-fluorodeoxyglucose (FDG) positron emission tomography (PET) is now a cornerstone for in vivo characterization and measurement of biologic processes, with several clinical applications, such as staging and assessment of treatment response.

Moreover, innovative PET radiotracers present novel clinical opportunities, such as the selection of patients for endocrine therapy, anti-HER2 therapy, and immunotherapy. For patients with metastatic breast cancer, 18F-fluoroestradiol (FES) is a promising tracer that can be used for a whole-body assessment of estrogen receptor status. The fibroblast activation protein inhibitor (FAPI), labeled with Gallium-68 or Fluor-18, is also under investigation, with encouraging results. For this Special Issue, we encourage the submission of papers considering innovative approaches using PET/CT imaging to guide the management of patients with a diagnosis of breast cancer.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
