Advances in the Diagnosis and Treatment of Venous Thromboembolism

Message from the Guest Editor

Venous thromboembolism (VTE), including deep vein thrombosis and pulmonary embolism (PE), is a commonly diagnosed condition with significant morbidity and mortality. In particular, PE is a life-threatening VTE manifestation, and it is of outstanding importance to establish the diagnosis in a timely manner. Nevertheless, the clinical presentation of acute PE patients comprises a wide spectrum, from asymptomatic patients to unspecific as well as typical symptoms, and it can be challenging to quickly establish the correct diagnosis. Additionally, a risk stratification of these patients is crucial to identify those who will benefit from more aggressive treatment strategies. These challenging aspects regarding VTE diagnosis, risk stratification and treatment, in light of medical progress, should be the aims of this Special Issue. Beyond specialists from cardiology and vascular medicine, researchers with a focus on imaging, inflammation or other affiliated disciplines are also invited to submit original articles or reviews to enhance the knowledge in VTE research.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.5 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
