

## Special Issue

# Diagnostics, Risk Factors, Treatment and Outcomes of Acute Kidney Injury in a New Paradigm

### Message from the Guest Editors

Acute kidney injury (AKI) is a frequent clinical syndrome among hospitalized patients, independently associated with both short- and long-term mortality. Previous investigations have attempted to identify effective interventions to prevent AKI or promote kidney function recovery in patients with AKI. Nevertheless, most were unsuccessful. Hence, additional studies are required in the field of AKI research. In this Special Issue, we are making a call to action to stimulate researchers and clinicians to submit their invaluable studies on AKI, as has been done in nephrology, internal medicine, critical care, and other disciplines that will provide additional knowledge and skills in the field of AKI research, ultimately to improve patient outcomes. Original investigations, review articles, and short communications are especially welcome. Potential topics include, but are not limited to, the following: AKI definition and diagnosis; AKI prevention; AKI in cardiac surgery; AKI after bone marrow or solid organ transplantation; Biomarkers of AKI; Cardiorenal Syndrome; Contrast-induced AKI; Critical care nephrology; Drug-induced AKI; Electronic AKI Alerts; Hepatorenal Syndrome; etc.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
