Diagnosis, Management and Prognosis of Acute Leukemia (AML and ALL): Current Challenges and Opportunities

Message from the Guest Editor

The therapeutic field of acute leukemia is undergoing a rapid change in both young and elderly patients for whom there are many new drugs available (including specific target therapies, monoclonal antibodies, liposomal delivery formulations). In this context, precise biological study of leukemic cells and assessment and follow-up of minimal residual disease remain essential to integrate these new drugs into clinical practice and achieve the optimal treatment of leukemia. In this Special Issue, we discuss the biggest challenges and opportunities that exist today at the clinical and biological level for adult patients with acute leukemia, including genetic and prognostic classification, measurable residual disease, intensive and nonintensive therapies, consolidation and maintenance options. Please click [here](#) to find information! Welcome to contribute!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
