Latest Advances in Pancreatic Neoplasms

Message from the Guest Editor

Pancreatic cancer is recognized as having one of the poorest prognoses of all cancers. Although it is recognized that the radical cure of pancreatic cancer requires multimodality treatment, combining chemotherapy and radiation, only 15% to 20% of patients are eligible for surgery. Chemotherapy for pancreatic cancer includes combination therapy with cytotoxic agents, while immunotherapy and other therapies are still in development. On the other hand, recent technological innovations have advanced our understanding of the genomic profile of pancreatic cancer, and there are high expectations for the development of new therapies such as molecularly targeted drugs for KRASG12C mutations, early diagnosis using ctDNA, new treatment strategies using AI, and multi-omics analysis. In this Special Issue, we focus on pancreatic cancer, for which the development of new diagnostic and therapeutic strategies is expected to accelerate in the future.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
