

Special Issue

Alopecia: Etiopathogenesis, Symptoms & Management

Message from the Guest Editors

Despite recent advances, there is still need for a more comprehensive understanding of the etiopathogenesis of scalp diseases. In addition to trichoscopy, new diagnostic tools are currently being developed to diagnose and differentiate between types of alopecia. Scalp diseases have a great impact on patients' quality of life. Moreover, some comorbidities have been related to alopecia, including alexithymia, obsessive-compulsive disorder, and autoimmune and cardiovascular diseases. Fortunately, the availability of therapeutic options for different types of alopecia is increasing. This Special Issue will focus on new research discussing the etiopathogenesis of different types of alopecia, new signs and symptoms to differentiate between them, and new treatment options for improving disease severity and patients' quality of life.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
