

## Special Issue

# Management of Atopic Dermatitis

### Message from the Guest Editor

Atopic dermatitis (AD) is a chronic inflammatory skin condition with variable clinical phenotypes, partly related to age, ethnicity, and disease severity, that causes a significant psychological and financial impact on patients, families and society. AD clinical and molecular heterogeneity highlights the unmet need for effective therapeutic options against more than one immune axis pathways. Therapeutic goals require a multistep approach to reduce pruritus and establish disease control primarily based on disease severity, patient's age, comorbidities, compliance, and costs. Topical and systemic drugs in development are innumerable and schematically divided into intra or extracellular agents. Ongoing randomized clinical trials demonstrate the efficacy and safety of several antagonist new drugs acting on objective and subjective disease parameters and on quality of life. However, studies on real-life experience are expected to include more information since patients from clinical trials do not act typically. This Issue examines the pathophysiology, epidemiology, heterogeneous clinical presentation, burden, diagnosis, and new topical and systemic emerging treatments of AD.

### Guest Editor

Prof. Luca Bianchi

Dermatology Unit, Department of Systems Medicine, Tor Vergata University of Rome, Rome, Italy

### Deadline for manuscript submissions

closed (31 January 2021)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
