Atopic Dermatitis: Research and Clinical Updates and Perspectives

Message from the Guest Editor

Atopic dermatitis (AD), or atopic eczema, is a chronic inflammatory cutaneous disorder. Novel insights in its pathophysiology and breakthrough therapeutics have changed the landscape of AD in the last decade. Genetic polymorphisms, microbiome diversity, skin barrier defects, modulation of innate and adaptive immunity, environmental exposure, and better understanding of the immunologic inflammatory pathways of both eczema and pruritus have shed new light on AD patients phenotypes and endotypes. In addition, several new treatment options, both topical and systemic, including biologics and small molecules, which target selective mediators in the inflammatory pathway have been added to the classical therapies. The aim of this issue is to present the forefront of recent research that has improved our understanding of AD and the new treatment options that are already available or are expected to be available in the near future.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
