Joint Repair and Replacement: Clinical Updates and Perspectives

Message from the Guest Editors

Primary and secondary osteoarthritis, post-traumatic and oncological sequelae, and articular avascular necrosis have always represented a challenging management problem for orthopaedic surgeons and traumatologists.

Today, thanks to technological improvement in terms of planning and implants, the possibilities of joint reconstruction and replacement, as well as of treatment of malalignments and loss of periarticular bone substance, have been considerably extended.

We are therefore proud to present this Special Issue of the Journal of Clinical Medicine, a reliable and serious journal, always committed to scientific divulgation in many fields of medical knowledge—in this case, serving orthopaedics and traumatology.

The aim of this Special Issue is to share the personal experience of groups and authors currently working on articular and periarticular treatment solutions, their impressions on opportunities and limits, the results obtained, and the problems that have arisen. All this can be achieved through valid research articles that prove to be of high impact and interest to the orthopaedic community.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
