Recent Advances on the Effects of Brain Injury to Vision and Vision Care

Message from the Guest Editor

The *Journal of Clinical Medicine* will be publishing a Special Edition devoted to recent advances on the effects of brain injury to vision and vision care. One aim of this edition is to provide research and/or review articles to better familiarize non-vision care providers with the impact of traumatic brain injury on patients' vision. Another goal is to demonstrate how traumatic brain manifestations are protean and demand a team approach not only for diagnosis but also therapy. Finally, it is hoped that readers of this Special Edition will recognize the value and limitations of current rehabilitation approaches as well as where current research is heading. I hope you will partner with us to improve awareness of how significantly brain injury impacts the lives of patients' vision and overall wellbeing in general.

Guest Editor

Dr. Eric Lowell Singman

Director, Clinic for Vision Concerns after TBI, Wilmer Eye Institute, Johns Hopkins Hospital, Baltimore, MD, USA

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
