Special Issue

Cancer and Inflammation in the Gastrointestinal Tract

Message from the Guest Editors

Inflammatory and malignant diseases of the GI tract are becoming the leading causes of morbidity, death and disability worldwide. In last few decades, progress has been achieved regarding their pathogenesis and management. Nevertheless, treatment results remain unsatisfactory. Inflammatory reactions can stimulate antitumor immune responses, but also have the capacity to promote tumor development. Data have shown that many of the processes involved in inflammation, such as leucocyte migration, local vascular dilation and enhanced permeability and angiogenesis, may contribute to tumor growth, progression and metastasis. The current pandemic, caused by severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2), has severely impacted human society, causing, in addition to respiratory tract diseases, diseases associated with the digestive tract. Patients with COVID-19 experienced an increase in the number and severity of GI symptoms. It also had a significant impact on patients with chronic digestive tract pathologies. Therefore, studies on GI inflammation and carcinogenesis are necessary to promote global health and well-being.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
