

Special Issue

Cardiac Ablation - Current Practice and Future Trends

Message from the Guest Editors

The focus of this Special Issue is to outline the trends for the future, as what has been forgotten in the field of cardiac arrhythmias is often a patient-oriented, individualized approach; in fact, both optimizing shared decision making about arrhythmia treatment options and ensuring that patient values need to be taken into account are of great importance. In addition, it is now recommended and pursued that patient-reported outcomes are routinely collected to measure treatment success and improve patient care and the quality of healthcare. With greater emphasis on the need for lifestyle modifications and targeted therapy for intercurrent conditions, both the reduction of the AF burden and the improvement of outcomes are now possible and warranted. It is our great privilege to invite you to contribute your work to this Special Issue on cardiac ablation. We ask that you provide your point of view or best results in terms of the individualized diagnosis and management of cardiac arrhythmias both in surgical and electrophysiological settings

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
