Special Issue

New Frontiers in Electrocardiography, Cardiac Arrhythmias, and Arrhythmogenic Disorders

Message from the Guest Editors

Novel electrocardiographic criteria along with new algorithms for the diagnostics and treatment of arrhythmias have been proposed, enabling more personalized patient management, including more rational use of imaging, implantable cardioverterdefibrillators, cardiac resynchronization therapy, and catheter ablation. The progress also concerns the diagnostics, treatment, and classification of arrhythmogenic disorders. Moreover, advancements in imaging and cardiovascular genetics make better diagnostics and risk stratification possible. However, personalized paths in arrhythmia management are increasingly needed. This Special Issue will focus on recent improvements, developments, and findings in the field of diagnostics and treatment of cardiac arrhythmias and arrhythmogenic disorders, including channelopathies and cardiomyopathies. Furthermore, papers summarizing the current state of knowledge, papers on arrhythmias related to specific diseases (e.g., sleep apnea) or disciplines, and those highlighting potential gaps in our understanding of cardiac arrhythmias are also welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
