Cardiac Surgery-Associated Acute Kidney Injury: Current Update and Perspectives

Message from the Guest Editors

Cardiac surgery-associated acute kidney injury (CSA-AKI) is a recognized and serious complication and one of the stronger risk factors for mortality in patients undergoing cardiac surgery. In its more severe form, it increases the likelihood of death by 50%-80%. Even a mild increase in serum creatinine after cardiac surgery entails a higher morbidity with longer length of stay in both hospital and intensive care unit and higher costs of care. Despite all the recent advancements, we need to improve both our general understanding and our capacity to effectively diagnose, treat and/or prevent CSA-AKI, as it still is a widely held concern and remains as a threat to the critical care team. This Special Issue aims not only to provide an updated comprehensive approach of this disease, in which milieu of factors are intertwined, but also to introduce the latest advances in diagnosis, treatment, and prevention strategies to try to properly tackle this issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
