

## Special Issue

# Improving the Diagnosis of Acute Myocardial Infarction

### Message from the Guest Editor

The introduction of high-sensitivity cardiac troponin (hs-cTn) in recent years has substantially increased the accuracy in rapidly identifying acute myocardial infarction (AMI) and has enabled the development and extensive validation of early hs-cTn-based diagnostic algorithms, which has substantially reduced the time required for the safe rule-out or rule-in of AMI. Despite these great advances, there are still several interesting topics in the diagnosis of AMI using hs-cTn for further improvements. The differentiation of myocardial infarction vs. myocardial injury or differentiation between type 1 or 2 myocardial infarction and, consequently, the different therapeutic approaches still remain challenging today. In addition, the clinical benefit of using sex-specific reference values for hs-cTn remains controversial. Finally, the practicability of introducing rapid diagnostic algorithms (e.g., 0/1 h ESC algorithm) in different health care systems worldwide has also been recently questioned. In this Special Issue, we welcome the submission of original research and review articles to deepen the latest evidence in the field of using hs-cTn for the diagnosis of AMI.

### Guest Editor

Dr. Maria Rubini Giménez

Department of Cardiology, Heart Center Leipzig, Leipzig, Germany

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
