Coronary Syndrome: Clinical Treatment, Prevention and Management for Better Outcomes

Message from the Guest Editors

Coronary artery disease is still one of the major cardiovascular diseases that can impose substantial burdens of clinical and even socioeconomic problems. In addition to the conventional concept of "acute coronary syndrome", the new concept of "chronic coronary syndrome" (revised from "stable coronary artery disease") has become established in recent years. Accumulated data have implicated that there are some residual risk factors for the coronary syndrome, and clinical management of cardiovascular/non-cardiovascular complications associated with the coronary syndrome are also critical issues of concern for better outcomes. In this Special Issue, we are calling for papers regarding all types of clinical research to address these unmet clinical needs in the area of coronary syndrome prognosis. **Keywords**

- acute coronary syndrome
- chronic coronary syndrome
- percutaneous coronary intervention
- coronary artery bypass grafting
- treatment
- risk factors
- prevention
- complications
- outcomes

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
