

## Special Issue

# Cardiopulmonary Resuscitation: Clinical Updates and Perspectives

### Message from the Guest Editors

Cardiac arrest and cardiopulmonary resuscitation (CPR) continue to be major burdens worldwide. To address these and further issues, international and national resuscitation guidelines are published regularly, most recently the European and American guidelines. These guidelines, published every five years, contain full details on epidemiology, livesaving systems, first aid, basic and advanced life support, and cardiac arrest in special circumstances. In addition, there are also chapters concerning newborns, infants, and other aspects of pediatric life support. Other important topics, such as post-resuscitation care, education for resuscitation, and, since the COVID-19 pandemic at least, the ethics of resuscitation and end-of-life decisions, are also addressed. The scope of this Special Issue is to provide an overview of recent advances in the field of CPR, with each topic being addressed by experts in the field. Therefore, researchers in the field of CPR are encouraged to submit original articles or reviews to this Special Issue (case reports and short reviews are not accepted).

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
