

Special Issue

Cardiovascular Disease: From Molecular Mechanisms to Clinical Therapies

Message from the Guest Editor

According to the most updated epidemiologic studies, cardiovascular disorders remain the leading cause of death. In fact, despite substantial advances in the care of patients, the incidence of cardiovascular disease continues to increase. Therefore, the search for novel mechanisms and therapeutics is desperately needed, and translational studies represent the best strategy to uncover novel therapeutic targets, reduce mortality, and improve the quality of life. In summary, this Special Issue aims to underscore the key importance of basic cardiovascular research in the clinical scenario. Potential topics include, but are not limited to, the following:

- Atherosclerosis
- Hypertension
- Myocardial infarction
- Heart failure
- Cardiac Arrhythmias
- Metabolic Syndrome
- Stroke
- Pulmonary hypertension
- Peripheral Artery Disease (PAD)
- Acute Coronary Syndrome
- Myocarditis
- Pericarditis
- Valvulopathies

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
