Recent Research of Carpal Tunnel Syndrome

Message from the Guest Editor

Carpal tunnel syndrome (CTS) is a common compression neuropathy in the general population. In addition to unpleasant symptoms, the disease significantly causes sick leave, incapacity for work, and doctor visits. Surgical decompression of the median nerve is one of the most common surgical operations. There are many impressive things behind CTS that we do not know yet. Is genetics providing any new information about the underlying factors and pathology of carpal tunnel syndrome? Diagnostics and differential diagnostics of CTS have their own challenges, and new methods such as ultrasound and handheld devices can challenge traditional electrodiagnostic methods. Conservative treatment practices of CTS are diverse and unambiguous best practice is not clear. When the CTS diagnosis and treatment is done too late for nerves to recover or there is perioperative complication, some late reconstructive surgeries might be needed. This Special Issue will present the latest research on this interesting and clinically significant syndrome from the best researchers in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
