Hypothyroidism: Causes, Effects and Current Treatments

Message from the Guest Editors

The main objective of the Research Topic: “Hypothyroidism: Causes, Effects and Current Treatments”, is to provide an update on the most important topic of thyroid pathology at any age, with particular attention to the innovations in the field of etiopathogenesis, diagnosis and treatment of congenital and acquired hypothyroidism, autoimmune thyroid pathology, subclinical hypothyroidism. Also the experiences expect the peculiarity of thyroid pathology in chronic and genetic diseases. We are also interested in topic of other comorbidities in the condition of hypothyroidism.

Furthermore, another focal point is to carry out a comparison between researchers and clinicians with the aim of transferring the most recent innovations into daily practice, adopting shared lines of behavior, and thus strengthening the integration between pediatric and adult endocrinologists.

Two types of Papers, as expected for Journal of Clinical Medicine, can be sent : Original Research and Systematic Review.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
