Chronic Heart Failure in Perspective

Message from the Guest Editor

Heart failure (HF) is a multifactorial and heterogeneous syndrome for which significant therapeutic progress has been made based on clinical trials. The application of biomarkers, the contribution of cardiac multimodality imaging, the use of telemedicine, and the incorporation of new molecules and devices in the treatment of heart failure require constant updating. Moreover, while a therapy based on neurohumoral modulation appears to be effective in the treatment of HF with reduced left ventricular ejection fraction (HFrEF), it is not fully functional for HF with preserved left ventricular ejection fraction, and the demonstration of a marginal benefit in the latter case required meta-analyses and post-hoc analyses of classic trials that originally produced neutral results. In fact, HFpEF is currently considered the largest unmet challenge in cardiology. The present Special Issue aims to explore new aspects that may contribute to the management of this complex syndrome. We would be honored to have robust contributions from heart failure experts in order to update the scientific literature on this important and complex topic.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
