

## Special Issue

# Claudication: The Artery and Beyond

### Message from the Guest Editor

Claudication is an exercise-related symptom. When of arterial origin, it results from the transient positional compression of a healthy artery or from the inability of permanently diseased vessels to fulfil the increased oxygen requirements of the muscles during physical activity. This Special Issue aims to see beyond the artery and consider an integrative or altitudinal view of the relationship between the complaints of the patients and the underlying cause of symptoms. We welcome papers dealing with the following topics: (1) claudication of non-arterial origin; (2) how the artery interacts with its local environment in patients with arterial claudication; (3) how comorbid conditions should be accounted for in the diagnosis, treatment and follow up of patients with claudication of suspected, debatable or uncertain arterial origin; (4) the relationship of symptoms and arterial disease severity such as the importance of exercise intensity and activity inactivity; and (5) the influence of factors such as gender, age, motivation, nutrition, mood and modulation of pain expression on the symptoms of underlying disease.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
