Claudication: The Artery and Beyond

Message from the Guest Editor

Claudication is an exercise-related symptom. When of arterial origin, it results from the transient positional compression of a healthy artery or from the inability of permanently diseased vessels to fulfil the increased oxygen requirements of the muscles during physical activity. This Special Issue aims to see beyond the artery and consider an integrative or altitudinal view of the relationship between the complaints of the patients and the underlying cause of symptoms. We welcome papers dealing with the following topics: (1) claudication of non-arterial origin; (2) how the artery interacts with its local environment in patients with arterial claudication; (3) how comorbid conditions should be accounted for in the diagnosis, treatment and follow up of patients with claudication of suspected, debatable or uncertain arterial origin; (4) the relationship of symptoms and arterial disease severity such as the importance of exercise intensity and activity inactivity; and (5) the influence of factors such as gender, age, motivation, nutrition, mood and modulation of pain expression on the symptoms of underlying disease.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
