

Special Issue

Updates and Challenges in Maxillo-Facial Surgery

Message from the Guest Editor

Maxillofacial surgery is a rapidly evolving specialty that includes a wide variety of subspecialties, all of which are equally innovative in advancing OMFS. This Special Issue, "Updates and Challenges in Maxillo-Facial Surgery", addresses scholars in the fields of trauma, oncology, reconstructive and facial plastic surgery, orthognathic surgery, craniofacial and cleft palate, TMJ, pre-prosthetic surgery, and neighbouring fields to contribute research discussing conceptual changes and improvements in the tremendous technical and surgical innovations introduced into the field over the last years. These include virtual surgical planning, patient-specific implants, and regenerative techniques. This Special Issue also focuses on challenges such as unfavourable sequelae and complications, quality of life, and calls for papers discussing problems which must be resolved to further propagate our specialty and improve outcomes and benefit for our patients. **Keywords**

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
