# Novel Technology Application for Clinical Neurorehabilitation

## Message from the Guest Editor

Neurorehabilitation for various diseases affecting the central nervous system is important for recovery. Conventional rehabilitation such as physical or occupational therapy has been provided, but the effect is usually limited. Novel technologies are expected to open up new opportunities for better recovery. In this Special Issue, we aim to present recent advances in the clinical application of novel technologies for neurorehabilitation. The novel technologies may include virtual/augmented/mixed reality, neuromodulation, robotics, the brain-computer interface, wearable devices, and so on. Submissions of clinical trials with sound methodologies are encouraged. Pilot feasibility trials with new therapeutic approaches and neurophysiological outcomes (e.g., parameters from biosensors or imaging (EEG, EMG, fNIRS, fMRI, and so on)) and review studies can also be considered. Preclinical studies using animal models and case reports are not considered for review.

## **About the Journal**

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
