

Special Issue

Colorectal Surgery: Latest Advances and Prospects

Message from the Guest Editor

Colorectal surgery has been rapidly evolving over the last few years. Newer technologies and techniques are used. Indeed, much needs to be explored in the field, as the desire to shed light on grey areas is constantly growing, in parallel with the implementation of innovations into clinical practice. The aim of the present Special Issue is to serve as a forum for critically addressing how the advent of recent technological developments has impacted the outcomes of colorectal surgery, the way patients are managed perioperatively, postoperative recovery, and patient experience throughout an operation. Manuscripts are invited critically assessing the role of minimally invasive approaches, application of artificial intelligence and big data to decision making, peroperative patient optimization, application of translational research in coloproctology, or comparing the outcomes of different innovative approaches to colorectal diseases. In summary, the Special Issue aims to increase clinicians' knowledge of poorly explored areas of coloproctology, as well as to provide a balanced, sound, and evidence-based overview of the advances and potential perspectives in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
