Management of Dental Caries

Message from the Guest Editor

Dental caries continue to affect a large part of the world's population at all ages of life, and dental caries management is a topical issue that has opened debates on the reform of cariology curricula in universities.

Caries risk assessment, advances in the diagnosis of lesions and the rate of progression of initial lesions are important elements to consider in its management and control. Clinicians must have more sensitive diagnostic procedures that allow monitoring the evolution of lesions in patients, and clinicians must recognize the most effective procedures that can be applied both in non-operative preventive treatments and in restorative operative treatments. The use of new biomaterials can improve the durability of restorations and reduce the removal of dental tissues. The scope of this Special Issue is to provide an overview of recent advances in the field of dental caries management. Researchers in this field are, therefore, encouraged to submit an original article or systematic review to this Special Issue (case reports and short reviews will not be accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
