

Special Issue

Clinical Research and Management of Diabetes Complications

Message from the Guest Editor

Diabetes mellitus is a chronic disease which results in a major global burden for patients and health care systems, affecting approximately 9 to 26 million people worldwide each year. Long diabetes duration and consistently high blood glucose levels can lead to serious diseases affecting the heart and blood vessels, eyes, kidneys, and nerves. Due to its multi-organ damage, diabetes is the main cause of cardiovascular disease, blindness, renal failure, and lower limb amputation in all high-income countries. New targeted therapies, such as new hypoglycemic drugs, appear to have a promising role in preventing diabetes complications, mainly cardiovascular disease. In addition, a multidisciplinary approach including different specialties is required in the management of patients with diabetic complications to improve benefits and outcomes, and to reduce morbidity and mortality. For this Special Issue, we encourage submissions discussing the current state-of-the-art, the management of risk factors, new therapies, and unmet needs regarding diabetes-related complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
