

## Special Issue

# Diabetes Epidemiology, Prevention and Treatment

### Message from the Guest Editor

The management of type 1 and type 2 diabetes remains a challenge for physicians and patients around the globe, especially in developing countries where access to care and medication is still suboptimal. Impaired glucose tolerance, gestational diabetes, and diabetes in pregnancy are additional disturbances of the glucose tolerance that affects millions of people in both the developed and developing world, challenges our health providers day-to-day, and affects our populations. Because of the challenge that diabetes and diabetes management represents for the scientific community and health providers worldwide, this Special Issue of the *Journal of Clinical Medicine* will be dedicated to publishing the best articles reflecting efforts and innovation aiming to better diagnose, measure the impact, develop treatments and education for diabetes and related issues. In the present Special Issue, we expect to collect the best original and review articles on a number of aspects related to diabetes, diabetes prevention, control, treatment, epidemiology, education and other matters related to this prevalent disease.

### Guest Editor

Dr. Alberto Barcelo

1. Epidemiology and Public Health, Department of Public Health Science, University of Miami School of Medicine, University of Miami, Miami, FL, USA
2. Department of Medical Clinic, University of Juiz de Fora, São Pedro, MG, Brazil

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
