Disseminated Intravascular Coagulation: Current Understanding and Future Perspectives

Message from the Guest Editor

Disseminated intravascular coagulation is characterized by systemic activation of blood coagulation, which results in the generation and deposition of fibrin, leading to microvascular thrombi in various organs and contributing to multiple organ dysfunction. Also, simultaneous neutrophil activation and endothelial injury associated with glycocalyx perturbation have been observed in these patients. Although there have been several recent advances in the pathophysiology of disseminated intravascular coagulation, the clinical significance of diagnoses and therapeutic interventions targeting disseminated intravascular coagulation is uncertain so far. Therefore, understanding the pathophysiology of disseminated intravascular coagulation and novel therapeutic strategies are vitally important issues for the management of critically ill settings. In this Special Issue of the *Journal of Clinical Medicine*, we will discuss the etiology, pathophysiology, clinical manifestations, diagnostic, and optimal management to treat critically ill patients with disseminated intravascular coagulation.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
