

## Special Issue

# The Role of Endocrine Disrupting Chemicals in the Feto-Placental Unit and Female Reproduction

### Message from the Guest Editors

Endocrine disrupting chemicals (EDCs) are environmental chemicals that interfere with physiological systems, adversely affecting the hormonal balance within various endocrine axes (particularly within the female reproductive system) or disrupting normal function in the target organs that these hormones regulate. EDCs include a variety of chemicals classes, such as industrial by-products, pesticides, and chemicals, used in manufacturing (particularly plastics). The US Centers for Disease Control and Prevention (CDC) have reported that more than 90% of 2000 individuals tested positive for chemicals in their blood. Moreover, in a report to the WHO (The State of the Science of Endocrine Disrupting Chemicals-2012), key concerns were raised regarding the *“high incidence and the increasing trends of many endocrine-related disorders in humans”*. Emerging studies have linked EDCs with disorders at the placental level, impact later in adult life. Contributions to this Special Issue will advance our understanding of the role of EDCs in placental development and placental functions...

### Guest Editors

Prof. Dr. Emmanouil Karteris

Dr. Ioannis Kyrou

Dr. Harpal S. Randeva

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
