Innovations in Endodontic Dentistry

Message from the Guest Editor

The field of endodontics has evolved tremendously in the past decade in many ways, and its applications have led to the retention of more natural teeth than ever.

Endodontics today focus not only on the eradication of bacterial infection in the root canal system but also on the restoration of normal pulp to a functional state using mesenchymal stem cells. This Special Issue aims to highlight current knowledge in contemporary clinical research on endodontics, including the study of outcomes, the pathogenesis of pulpal and periradicular disease, biomechanical instrumentations of root canals, microendodontics such as endodontic microsurgery, replantation, tooth transplantations, and the future of pulpal and periodontal regeneration.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
